

PCC does not believe in charging the prohibitive upfront costs that other companies have made standard in selling EHRs. Instead, we have built a pricing structure that will consist of an initial implementation fee and a monthly cost that includes software licensing, PCC support, and ongoing updates. PCC EHR will run on your Partner Server, so your hardware expenses will likely be limited to workstations (PCs, laptops, or tablets), scanners, and any necessary networking equipment. PCC will help you determine your hardware needs during the Guided Go-Live Process. Our goal in pricing PCC EHR is to reduce the financial obstacle to pediatric practices when taking this important step. Here's a look at the pricing for PCC EHR. This pricing includes Guided Go-Live service and is backed by our expert 24/7 Guaranteed Support.
